### Investment Strategy

This Fund is designed for less conservative clients who want to combine benefits of higher potential appreciation of equities and lower volatility of bond component of the portfolio. Recommended minimum investment horizon is 5 years. The portfolio of the Fund is divided between the equity and bond component where the proportion of equities in the neutral scenario reaches 60%, one third of which comes from the emerging markets region, the rest is represented by a selection of global equities. The bond component consists of a balanced mix of government and corporate bonds, in particular from the region of Central and Eastern Europe.
