Minimal investment horizon

More than 8 Y

Investment Strategy

The Fund represents an offer for especially dynamic investors who seek an opportunity for high appreciation and who also accept a higher risk and longer investment horizon (at least 8 years). The aim is to make investments into a diversified global equity portfolio in markets characterised by a significant yield potential and belonging at the same time into a group of so called emerging (developing) economies. These countries are characterised by a high growth potential and attractive appreciation as compared with developed markets in the USA or in the Euro zone. The portfolio contains equity holdings regionally coming from Asia, Latin America or Central and Eastern Europe which are considered very credible leaders with a fast dynamic growth in a particular region.
