- To achieve its objective the Fund will invest most assets in bonds and other debt securities (rated AAA to B- by Standard & Poor's or another reputable rating agency or unrated securities provided that Generali Investments CEE is of the opinion that such unrated securities have a credit quality comparable to B- or better) issued or guaranteed by governments, government agencies or associated entities, supranational or public international organisations, in bonds and other debt securities (including asset-backed and mortgage-backed securities) issued by corporations or financial institutions worldwide (including the Commonwealth of Independent States). Fewer assets the Fund will invest in equities and equity related securities, such as preference shares, American Depositary Receipts and Global Depositary Receipts, in securities which gain exposure to commodities and commodity indices such as exchange traded commodities, exchange traded notes and index certificates, in open-ended collective investment schemes as well as in transferable money market instruments including deposits or time deposits and certificates of deposit and short term bond funds (rated both above and below investment grade or unrated).
- The Fund will use a limited number of derivative instruments such as swaps and forwards for non-complex efficient portfolio management and hedging. Hedging is a currency transaction which aims to protect against exchange rate movements.
- Generali Investments CEE has full discretion in selecting the Fund's assets. The Fund does not have any particular target in relation to any industrial, geographic or other market sectors.
- All gains will be reinvested and it is not intended to declare dividends.

What are the risks and what could I get in return?

Risk Indicator

The risk indicator assumes you keep the product for 5 years.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 3 out of 7, which is a medium-low risk class.

This rates the potential losses from future performance at a medium-low level, and poor market conditions are very unlikely to impact the capacity to pay you.

Risks materially relevant to the Fund which are not adequately captured by the indicator are: derivative, settlement, concentration.

This product does not include any protection from future market performance so you could lose some or all of your investment.

If Generali Investments CEE is not able to pay you what is owed, you could lose your entire investment.
